

Paper to CAD Conversion Service

Large Format Drawings to Fully-Editable CAD Files (DWG/DXF)

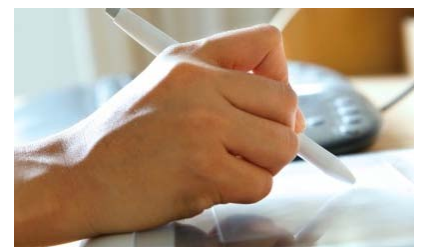

Large format drawings are space-consuming however they are stored but can't be thrown away as they continue to be useful. We offer a service where the drawings are converted to an editable AutoCAD format (DWG) as well as PDF so you can retain a digital copy and dispose of the originals.

We take your drawings, scan them on our large format scanners, then draft/convert the scanned images to fully-editable, accurate CAD files enabling ease-of-use and maximum space-saving.

But It Isn't Just a CAD Service; It's CAD Perfect.

There's nothing automated about our CAD service. We call it our CAD Perfect service as it's completed by hand to ensure that you're getting a completely accurate, editable version of your drawings.

Benefits:

- Peace-of-mind backup of your legacy drawings
- Fully editable files, no need for physical prints / archive.
- A low-cost solution which potentially saves thousands in the longrun
- Saves space by digitising space consuming drawings
- Fast, easy and shared access
- File can be updated as it is fully edited
- A better and more flexible option than simple PDF or TIFF files

The DWG Format

For those unfamiliar with the DWG format, it is the native format for several CAD packages including **DraftSight**, **AutoCAD**, **IntelliCAD** (and its variants) and **Caddie**. In addition, DWG is supported non-natively by many other CAD applications.

It is the most common CAD file, hence why we prefer to convert to this format. However we are able to convert to other CAD formats if required.

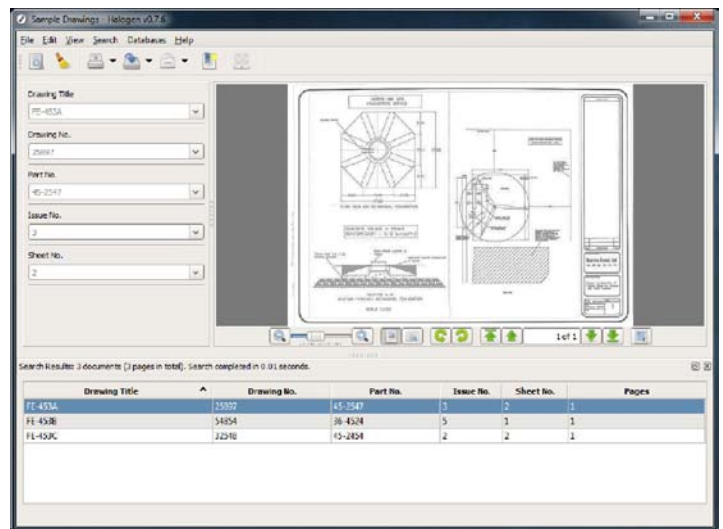

Drawing Management Software

We also supply a drawing management software, Halogen which can be used to store and view your drawings with ease.

Drawings are indexed by their drawing number, client name or any mixture of details from the drawings themselves to make searching for them even easier.

Halogen is supplied free of charge with our scanning service.

Are you interested in our CAD Conversion services?

The benefits speak for themselves as a way to modernise, save space and money whilst allowing your drawings to be flexible again.
